Responsive Web Design
Accessibility & Progressive Enhancement
Vanilla JavaScript
Web Components & Lit
Vue.js & Nuxt
Pinia & Vite
Docker & Git
Continuous Integration

Kind Words

I have worked together with Stefan on front-end projects for over 10 years, and the work was always done on time, on budget, and with a high degree of professionalism.

It's obvious he takes tremendous pride in his work, and I wouldn't hesitate to recommend or work with him again.

Thomas Nitsche, VP of Engineering, Experteer GmbH

Stefan has been supporting the company for years. He played a key role in developing our front-end further and always delivered on time and with great additional ideas.

I would definitely work with Stefan again and can highly recommend him.

Nina Zimmermann, CEO, tracdelight GmbH

Personal Statement

I'm a front-end developer with a focus on HTML, CSS, accessibility and progressive enhancement, and I like to stick to browser APIs whenever possible.

Features that used to require libraries or frameworks can now be easily implemented using vanilla JavaScript.
